

A list of Large Airports

I need the following fields in a results file:

Airport name

Airport IATA Code

City

Country ISO Code

Country Name

I would like the results to be sorted by Continent and Country

Data files available to you include:

ISOCountryCodes.txt

world-cities.csv

airport-codes.csv

Assignment checklist:

There should be 566 Large Airports in the results.

If they are sorted correctly, the first and last entries should be:

Houari Boumediene Airport

ALG Algiers DZ [Algeria]

...

Carrasco International /General C L Berisso Airport MVD Montevideo UY [Uruguay]

Some of the requested fields may be null, if so, please output spaces in place of the missing data, for example the following entry has no IATA code:

Sungai Siring International Airport

Samarinda ID [Indonesia]
