

Australian Customer Summary

I need a new fixed format MVS file containing the following details:

- **Province/Territory Code**
- **Province/Territory Name**
- **Count of Customers who live in this Province/Territory**
- **Date the record was created (DD-MM-YYYY)**

This assignment should use JCL DD statements to pass the names of the input and output files.

Input files

au-500.csv

au-50000.csv

au-1000000.csv

Notes:

NS:New South Wales

QL:Queensland

SA:South Australia

TA:Tasmania

VI:Victoria

WA:Western Australia

AC:Australian Capital Territory

NT:Northern Territory

CC:Cocos (Kelling) Islands

CS:Christmas Island

HM:Heard Island and McDonald
Island

NF:Norfolk Island

Assignment Checklist:

The results file should have 12 records, one for each Province/Territory.

Using the au-500.csv file QL (Queensland) has 112 customers

Using the au-50000.csv file QL has 12013 customers

Using the au-1000000.csv file QL has 239403 customers.
